

If I am willing to pay for the privilege of Satellite radio, Why should it be restricted. If local radio stations want to compete then like many TV station, they can purchase satellite too. To unfairly stifle competition by giving them an edge is to take away privileges that I willingly pay for. There is nothing unfair about it, if local broadcasters want to play fair, they too can purchase and broadcast on satellite. I live in Wyoming a low population area that depends on satellite radio to provide information of all kinds. Please do not take that away.
